PERSONAL SKILLS AND COMPETENCES

Ability to study for a long time (hours) without losing concentration. I am used to completing the work that I started and to comply with the deadlines without asking for extensions. I have good relational skills and I can understand the complex situations and moods of the people I work with, without they tell me first. I also quickly learn both theoretical and practical concepts; finally, I can repeat concepts and ideas in a clear, consequential, logical and simple way

ORGANIZATIONAL SKILLS

My organizational skills have been acquired during the years of study where I learned a method that allows me to minimize the times and maximize the result: all the examinations of the three-year degree and those of master degree have been done at first appeal with excellent results (average 29.5). I have a great willpower, ability to meet the deadlines that I had set, and to appropriately divide the workload. Other organizational skills have been gained through the activities of study groups when I helped many of my companions support exams by fixing dates and dividing day by day the work to be done. I also learned to work together and make group decisions through political activity and volunteering.
